

CompTIA A+ Certification Exam Core 2 Objectives

EXAM NUMBER: CORE 1 (220-1102)

About the Exam

Candidates are encouraged to use this document to help prepare for the CompTIA A+ 220-1102 certification exam. In order to receive the CompTIA A+ certification, you must pass two exams: Core 1 (220-1101) and Core 2 (220-1102). The CompTIA A+ Core 1 (220-1101) and Core 2 (220-1102) certification exams will verify the successful candidate has the knowledge and skills required to:

- Install, configure, and maintain computer equipment, mobile devices, and software for end users
- Service components based on customer requirements
- Understand networking basics and apply basic cybersecurity methods to mitigate threats
- Properly and safely diagnose, resolve, and document common hardware and software issues
- Apply troubleshooting skills and provide customer support using appropriate communication skills
- Understand the basics of scripting, cloud technologies, virtualization, and multi-OS deployments in corporate environments

This is equivalent to 12 months of hands-on experience working in a help desk support, desktop support technician, or field service technician job role. These content examples are meant to clarify the test objectives and should not be construed as a comprehensive listing of all the content of this examination.

EXAM ACCREDITATION

The CompTIA A+ Core 2 (220-1102) exam is accredited by ANSI to show compliance with the ISO 17024 standard and, as such, undergoes regular reviews and updates to the exam objectives.

EXAM DEVELOPMENT

CompTIA exams result from subject-matter expert workshops and industry-wide survey results regarding the skills and knowledge required of an entry-level IT professional.

CompTIA AUTHORIZED MATERIALS USE POLICY

CompTIA Certifications, LLC is not affiliated with and does not authorize, endorse, or condone utilizing any content provided by unauthorized third-party training sites (aka “brain dumps”). Individuals who utilize such materials in preparation for any CompTIA examination will have their certifications revoked and be suspended from future testing in accordance with the CompTIA Candidate Agreement. In an effort to more clearly communicate CompTIA’s exam policies on use of unauthorized study materials, CompTIA directs all certification candidates to the [CompTIA Certification Exam Policies](#). Please review all CompTIA policies before beginning the study process for any CompTIA exam. Candidates will be required to abide by the [CompTIA Candidate Agreement](#). If a candidate has a question as to whether study materials are considered unauthorized (aka “brain dumps”), he/she should contact CompTIA at examsecurity@comptia.org to confirm.

PLEASE NOTE

The lists of examples provided in bulleted format are not exhaustive lists. Other examples of technologies, processes, or tasks pertaining to each objective may also be included on the exam, although not listed or covered in this objectives document. CompTIA is constantly reviewing the content of our exams and updating test questions to be sure our exams are current, and the security of the questions is protected. When necessary, we will publish updated exams based on existing exam objectives. Please know that all related exam preparation materials will still be valid.

TEST DETAILS

Required exam	A+ Core 2 (220-1102)
Number of questions	Maximum of 90
Types of questions	Multiple-choice and performance-based
Length of test	90 minutes
Recommended experience	12 months of hands-on experience in a help desk support technician, desktop support technician, or field service technician job role

EXAM OBJECTIVES (DOMAINS)

The table below lists the domains measured by this examination and the extent to which they are represented.

DOMAIN		PERCENTAGE OF
1.0	Operating Systems	31%
2.0	Security	25%
3.0	Software Troubleshooting	22%
4.0	Operational Procedures	22%
Total		100%

1.0 Operating Systems

1.1 Identify basic features of Microsoft Windows editions.

- **Windows 10 editions**
 - Home
 - Pro
 - Pro for Workstations
 - Enterprise
- **Feature differences**
 - Domain access vs. workgroup
 - Desktop styles/user interface
 - Availability of Remote Desktop Protocol (RDP)
 - Random-access memory (RAM) support limitations
 - BitLocker
 - gpedit.msc
- **Upgrade paths**
 - In-place upgrade

1.2 Given a scenario, use the appropriate Microsoft command-line tool.

- **Navigation**
 - cd
 - dir
 - md
 - rmdir
 - Drive navigation inputs:
 - C:\ or D:\ or x:\
- **Command-line tools**
 - ipconfig
 - ping
 - hostname
 - netstat
 - nslookup
 - chkdsk
 - net user
 - net use
 - tracert
 - format
 - xcopy
 - copy
 - robocopy
 - gpupdate
 - gprestart
 - shutdown
 - sfc
 - [command name] /?
 - diskpart
 - pathping
 - winver

1.3 Given a scenario, use features and tools of the Microsoft Windows 10 operating system (OS).

- **Task Manager**
 - Services
 - Startup
 - Performance
 - Processes
 - Users
 - **Microsoft Management Console (MMC) snap-in**
 - Event Viewer (eventvwr.msc)
 - Disk Management (diskmgmt.msc)
 - Task Scheduler (taskschd.msc)
 - Device Manager (devmgmt.msc)
 - Certificate Manager (certmgr.msc)
 - Local Users and Groups (lusrmgr.msc)
 - Performance Monitor (perfmon.msc)
 - Group Policy Editor (gpedit.msc)
 - **Additional tools**
 - System Information (msinfo32.exe)
 - Resource Monitor (resmon.exe)
 - System Configuration (msconfig.exe)
 - Disk Cleanup (cleanmgr.exe)
 - Disk Defragment (dfrgui.exe)
 - Registry Editor (regedit.exe)
-

1.4 Given a scenario, use the appropriate Microsoft Windows 10 Control Panel utility.

- **Internet Options**
- **Devices and Printers**
- **Programs and Features**
- **Network and Sharing Center**
- **System**
- **Windows Defender Firewall**
- **Mail**
- **Sound**
- **User Accounts**
- **Device Manager**
- **Indexing Options**
- **Administrative Tools**
- **File Explorer Options**
 - Show hidden files
 - Hide extensions
 - General options
 - View options
- **Power Options**
 - Hibernate
 - Power plans
 - Sleep/suspend
 - Standby
 - Choose what closing the lid does
 - Turn on fast startup
 - Universal Serial Bus (USB) selective suspend
- **Ease of Access**

1.5 Given a scenario, use the appropriate Windows settings.

- Time and Language
 - Update and Security
 - Personalization
 - Apps
 - Privacy
 - System
 - Devices
 - Network and Internet
 - Gaming
 - Accounts
-

1.6 Given a scenario, configure Microsoft Windows networking features on a client/desktop.

- **Workgroup vs. domain setup**
 - Shared resources
 - Printers
 - File servers
 - Mapped drives
 - **Local OS firewall settings**
 - Application restrictions and exceptions
 - Configuration
 - **Client network configuration**
 - Internet Protocol (IP) addressing scheme
 - Domain Name System (DNS) settings
 - Subnet mask
 - Gateway
 - Static vs. dynamic
 - **Establish network connections**
 - Virtual private network (VPN)
 - Wireless
 - Wired
 - Wireless wide area network (WWAN)
 - **Proxy settings**
 - **Public network vs. private network**
 - **File Explorer navigation – network paths**
 - **Metered connections and limitations**
-

1.7 Given a scenario, apply application installation and configuration concepts.

- **System requirements for applications**
 - 32-bit vs. 64-bit dependent application requirements
 - Dedicated graphics card vs. integrated
 - Video random-access memory (VRAM) requirements
 - RAM requirements
 - Central processing unit (CPU) requirements
 - External hardware tokens
 - Storage requirements
- **OS requirements for applications**
 - Application to OS compatibility
 - 32-bit vs. 64-bit OS
- **Distribution methods**
 - Physical media vs. downloadable
 - ISO mountable
- **Other considerations for new applications**
 - Impact to device
 - Impact to network
 - Impact to operation
 - Impact to business

1.8 Explain common OS types and their purposes.

- **Workstation OSs**
 - Windows
 - Linux
 - macOS
 - Chrome OS
 - **Cell phone/tablet OSs**
 - iPadOS
 - iOS
 - Android
 - **Various filesystem types**
 - New Technology File System (NTFS)
 - File Allocation Table 32 (FAT32)
 - Third extended filesystem (ext3)
 - Fourth extended filesystem (ext4)
 - Apple File System (APFS)
 - Extensible File Allocation Table (exFAT)
 - **Vendor life-cycle limitations**
 - End-of-life (EOL)
 - Update limitations
 - **Compatibility concerns between OSs**
-

1.9 Given a scenario, perform OS installations and upgrades in a diverse OS environment.

- **Boot methods**
 - USB
 - Optical media
 - Network
 - Solid-state/flash drives
 - Internet-based
 - External/hot-swappable drive
 - Internal hard drive (partition)
- **Types of installations**
 - Upgrade
 - Recovery partition
 - Clean install
 - Image deployment
 - Repair installation
 - Remote network installation
 - Other considerations
 - Third-party drivers
- **Partitioning**
 - GUID [globally unique identifier] Partition Table (GPT)
 - Master boot record (MBR)
- **Drive format**
- **Upgrade considerations**
 - Backup files and user preferences
 - Application and driver support/backward compatibility
 - Hardware compatibility
- **Feature updates**
 - Product life cycle

1.10 Identify common features and tools of the macOS/desktop OS.

- **Installation and uninstallation of applications**
 - File types
 - .dmg
 - .pkg
 - .app
 - App Store
 - Uninstallation process
 - **Apple ID and corporate restrictions**
 - **Best practices**
 - Backups
 - Antivirus
 - Updates/patches
 - **System Preferences**
 - Displays
 - Networks
 - Printers
 - Scanners
 - Privacy
 - Accessibility
 - Time Machine
 - **Features**
 - Multiple desktops
 - Mission Control
 - Keychain
 - Spotlight
 - iCloud
 - Gestures
 - Finder
 - Remote Disc
 - Dock
 - **Disk Utility**
 - **FileVault**
 - **Terminal**
 - **Force Quit**
-

1.11 Identify common features and tools of the Linux client/desktop OS.

- **Common commands**
 - ls
 - pwd
 - mv
 - cp
 - rm
 - chmod
 - chown
 - su/sudo
 - apt-get
 - yum
- ip
 - df
 - grep
 - ps
 - man
 - top
 - find
 - dig
 - cat
 - nano
- **Best practices**
 - Backups
 - Antivirus
 - Updates/patches
- **Tools**
 - Shell/terminal
 - Samba

2.0 Security

2.1 Summarize various security measures and their purposes.

- **Physical security**
 - Access control vestibule
 - Badge reader
 - Video surveillance
 - Alarm systems
 - Motion sensors
 - Door locks
 - Equipment locks
 - Guards
 - Bollards
 - Fences
- **Physical security for staff**
 - Key fobs
 - Smart cards
 - Keys
 - Biometrics
- **Logical security**
 - Retina scanner
 - Fingerprint scanner
 - Palmprint scanner
 - Lighting
 - Magnetometers
 - Principle of least privilege
 - Access control lists (ACLs)
 - Multifactor authentication (MFA)
 - Email
 - Hard token
 - Soft token
 - Short message service (SMS)
 - Voice call
 - Authenticator application
- **Mobile device management (MDM)**
- **Active Directory**
 - Login script
 - Domain
 - Group Policy/updates
 - Organizational units
 - Home folder
 - Folder redirection
 - Security groups

2.2 Compare and contrast wireless security protocols and authentication methods.

- **Protocols and encryption**
 - WiFi Protected Access 2 (WPA2)
 - WPA3
 - Temporal Key Integrity Protocol (TKIP)
 - Advanced Encryption Standard (AES)
- **Authentication**
 - Remote Authentication Dial-In User Service (RADIUS)
 - Terminal Access Controller Access-Control System (TACACS+)
 - Kerberos
 - Multifactor

2.3 Given a scenario, detect, remove, and prevent malware using the appropriate tools and methods.

- **Malware**
 - Trojan
 - Rootkit
 - Virus
 - Spyware
 - Ransomware
 - Keylogger
 - Boot sector virus
 - Cryptominers
 - **Tools and methods**
 - Recovery console
 - Antivirus
 - Anti-malware
 - Software firewalls
 - Anti-phishing training
 - User education regarding common threats
 - OS reinstallation
-

2.4 Explain common social-engineering attacks, threats, and vulnerabilities.

- **Social engineering**
 - Phishing
 - Vishing
 - Shoulder surfing
 - Whaling
 - Tailgating
 - Impersonation
 - Dumpster diving
 - Evil twin
- **Threats**
 - Distributed denial of service (DDoS)
 - Denial of service (DoS)
 - Zero-day attack
 - Spoofing
 - On-path attack
 - Brute-force attack
 - Dictionary attack
 - Insider threat
 - Structured Query Language (SQL) injection
 - Cross-site scripting (XSS)
- **Vulnerabilities**
 - Non-compliant systems
 - Unpatched systems
 - Unprotected systems (missing antivirus/missing firewall)
 - EOL OSs
 - Bring your own device (BYOD)

2.5 Given a scenario, manage and configure basic security settings in the Microsoft Windows OS.

- **Defender Antivirus**
 - Activate/deactivate
 - Updated definitions
 - **Firewall**
 - Activate/deactivate
 - Port security
 - Application security
 - **Users and groups**
 - Local vs. Microsoft account
 - Standard account
 - Administrator
 - Guest user
 - Power user
 - **Login OS options**
 - Username and password
 - Personal identification number (PIN)
 - Fingerprint
 - Facial recognition
 - Single sign-on (SSO)
 - **NTFS vs. share permissions**
 - File and folder attributes
 - Inheritance
 - **Run as administrator vs. standard user**
 - User Account Control (UAC)
 - **BitLocker**
 - **BitLocker To Go**
 - **Encrypting File System (EFS)**
-

2.6 Given a scenario, configure a workstation to meet best practices for security.

- **Data-at-rest encryption**
 - **Password best practices**
 - Complexity requirements
 - Length
 - Character types
 - Expiration requirements
 - Basic input/output system (BIOS)/Unified Extensible Firmware Interface (UEFI) passwords
 - **End-user best practices**
 - Use screensaver locks
 - Log off when not in use
 - Secure/protect critical hardware (e.g., laptops)
 - Secure personally identifiable information (PII) and passwords
 - **Account management**
 - Restrict user permissions
 - Restrict login times
 - Disable guest account
 - Use failed attempts lockout
 - Use timeout/screen lock
 - **Change default administrator's user account/password**
 - **Disable AutoRun**
-

2.7 Explain common methods for securing mobile and embedded devices.

- **Screen locks**
 - Facial recognition
 - PIN codes
 - Fingerprint
 - Pattern
 - Swipe
- **Remote wipes**
- **Locator applications**
- **OS updates**
- **Device encryption**
- **Remote backup applications**
- **Failed login attempts restrictions**
- **Antivirus/anti-malware**
- **Firewalls**
- **Policies and procedures**
 - BYOD vs. corporate owned
 - Profile security requirements
- **Internet of Things (IoT)**

2.8 Given a scenario, use common data destruction and disposal methods.

- **Physical destruction**
 - Drilling
 - Shredding
 - Degaussing
 - Incinerating
 - **Recycling or repurposing best practices**
 - Erasing/wiping
 - Low-level formatting
 - Standard formatting
 - **Outsourcing concepts**
 - Third-party vendor
 - Certification of destruction/recycling
-

2.9 Given a scenario, configure appropriate security settings on small office/home office (SOHO) wireless and wired networks.

- **Home router settings**
 - Change default passwords
 - IP filtering
 - Firmware updates
 - Content filtering
 - Physical placement/secure locations
 - Dynamic Host Configuration Protocol (DHCP) reservations
 - Static wide-area network (WAN) IP
 - Universal Plug and Play (UPnP)
 - Screened subnet
 - **Wireless specific**
 - Changing the service set identifier (SSID)
 - Disabling SSID broadcast
 - Encryption settings
 - Disabling guest access
 - Changing channels
 - **Firewall settings**
 - Disabling unused ports
 - Port forwarding/mapping
-

2.10 Given a scenario, install and configure browsers and relevant security settings.

- **Browser download/installation**
 - Trusted sources
 - Hashing
 - Untrusted sources
- **Extensions and plug-ins**
 - Trusted sources
 - Untrusted sources
- **Password managers**
- **Secure connections/sites - valid certificates**
- **Settings**
 - Pop-up blocker
 - Clearing browsing data
 - Clearing cache
 - Private-browsing mode
 - Sign-in/browser data synchronization
 - Ad blockers

3.0 Software Troubleshooting

3.1 Given a scenario, troubleshoot common Windows OS problems.

- **Common symptoms**
 - Blue screen of death (BSOD)
 - Sluggish performance
 - Boot problems
 - Frequent shutdowns
 - Services not starting
 - Applications crashing
 - Low memory warnings
 - USB controller resource warnings
 - System instability
 - No OS found
 - Slow profile load
 - Time drift
- **Common troubleshooting steps**
 - Reboot
 - Restart services
 - Uninstall/reinstall/update applications
 - Add resources
 - Verify requirements
 - System file check
 - Repair Windows
 - Restore
 - Reimage
 - Roll back updates
 - Rebuild Windows profiles

3.2 Given a scenario, troubleshoot common personal computer (PC) security issues.

- **Common symptoms**
 - Unable to access the network
 - Desktop alerts
 - False alerts regarding antivirus protection
 - Altered system or personal files
 - Missing/renamed files
 - Unwanted notifications within the OS
 - OS update failures
- **Browser-related symptoms**
 - Random/frequent pop-ups
 - Certificate warnings
 - Redirection

3.3 Given a scenario, use best practice procedures for malware removal.

- | | | |
|---|---|---|
| <ol style="list-style-type: none"> 1. Investigate and verify malware symptoms 2. Quarantine infected systems 3. Disable System Restore (in Windows Home) | <ol style="list-style-type: none"> 4. Remediate infected systems <ol style="list-style-type: none"> a. Update anti-malware software b. Scanning and removal techniques (e.g., safe mode, preinstallation environment) | <ol style="list-style-type: none"> 5. Schedule scans and run updates 6. Enable System Restore and create a restore point (in Windows Home) 7. Educate the end user |
|---|---|---|
-

3.4 Given a scenario, troubleshoot common mobile OS and application issues.

- | | | |
|--|---|--|
| <ul style="list-style-type: none"> • Common symptoms <ul style="list-style-type: none"> - Application fails to launch - Application fails to close/crashes - Application fails to update - Slow to respond - OS fails to update - Battery life issues | <ul style="list-style-type: none"> - Randomly reboots - Connectivity issues <ul style="list-style-type: none"> □ Bluetooth □ WiFi □ Near-field communication (NFC) □ AirDrop | <ul style="list-style-type: none"> - Screen does not autorotate |
|--|---|--|
-

3.5 Given a scenario, troubleshoot common mobile OS and application security issues.

- | | |
|--|---|
| <ul style="list-style-type: none"> • Security concerns <ul style="list-style-type: none"> - Android package (APK) source - Developer mode - Root access/jailbreak - Bootleg/malicious application <ul style="list-style-type: none"> □ Application spoofing | <ul style="list-style-type: none"> • Common symptoms <ul style="list-style-type: none"> - High network traffic - Sluggish response time - Data-usage limit notification - Limited Internet connectivity - No Internet connectivity - High number of ads - Fake security warnings - Unexpected application behavior - Leaked personal files/data |
|--|---|

4.0 Operational Procedures

4.1 Given a scenario, implement best practices associated with documentation and support systems information management.

- **Ticketing systems**
 - User information
 - Device information
 - Description of problems
 - Categories
 - Severity
 - Escalation levels
 - Clear, concise written communication
 - Problem description
 - Progress notes
 - Problem resolution
- **Asset management**
 - Inventory lists
 - Database system
 - Asset tags and IDs
 - Procurement life cycle
 - Warranty and licensing
 - Assigned users
- **Types of documents**
 - Acceptable use policy (AUP)
 - Network topology diagram
 - Regulatory compliance requirements
 - Splash screens
- Incident reports
- Standard operating procedures
 - Procedures for custom installation of software package
- New-user setup checklist
- End-user termination checklist
- **Knowledge base/articles**

4.2 Explain basic change-management best practices.

- **Documented business processes**
 - Rollback plan
 - Sandbox testing
 - Responsible staff member
- **Change management**
 - Request forms
 - Purpose of the change
 - Scope of the change
 - Date and time of the change
 - Affected systems/impact
 - Risk analysis
 - Risk level
 - Change board approvals
 - End-user acceptance

4.3 Given a scenario, implement workstation backup and recovery methods.

- **Backup and recovery**
 - Full
 - Incremental
 - Differential
 - Synthetic
 - **Backup testing**
 - Frequency
 - **Backup rotation schemes**
 - On site vs. off site
 - Grandfather-father-son (GFS)
 - 3-2-1 backup rule
-

4.4 Given a scenario, use common safety procedures.

- **Electrostatic discharge (ESD) straps**
 - **ESD mats**
 - **Equipment grounding**
 - **Proper power handling**
 - **Proper component handling and storage**
 - **Antistatic bags**
 - **Compliance with government regulations**
 - **Personal safety**
 - Disconnect power before repairing PC
 - Lifting techniques
 - Electrical fire safety
 - Safety goggles
 - Air filtration mask
-

4.5 Summarize environmental impacts and local environmental controls.

- **Material safety data sheet (MSDS)/documentation for handling and disposal**
 - Proper battery disposal
 - Proper toner disposal
 - Proper disposal of other devices and assets
- **Temperature, humidity-level awareness, and proper ventilation**
 - Location/equipment placement
 - Dust cleanup
 - Compressed air/vacuums
- **Power surges, brownouts, and blackouts**
 - Battery backup
 - Surge suppressor

4.6 Explain the importance of prohibited content/activity and privacy, licensing, and policy concepts.

- **Incident response**
 - Chain of custody
 - Inform management/law enforcement as necessary
 - Copy of drive (data integrity and preservation)
 - Documentation of incident
 - **Licensing/digital rights management (DRM)/end-user license agreement (EULA)**
 - Valid licenses
 - Non-expired licenses
 - Personal use license vs. corporate use license
 - Open-source license
 - **Regulated data**
 - Credit card transactions
 - Personal government-issued information
 - PII
 - Healthcare data
 - Data retention requirements
-

4.7 Given a scenario, use proper communication techniques and professionalism.

- **Professional appearance and attire**
 - Match the required attire of the given environment
 - Formal
 - Business casual
- **Use proper language and avoid jargon, acronyms, and slang, when applicable**
- **Maintain a positive attitude/project confidence**
- **Actively listen, take notes, and avoid interrupting the customer**
- **Be culturally sensitive**
 - Use appropriate professional titles, when applicable
- **Be on time (if late, contact the customer)**
- **Avoid distractions**
 - Personal calls
 - Texting/social media sites
 - Personal interruptions
- **Dealing with difficult customers or situations**
 - Do not argue with customers or be defensive
 - Avoid dismissing customer problems
 - Avoid being judgmental
 - Clarify customer statements (ask open-ended questions to narrow the scope of the problem, restate the issue, or question to verify understanding)
 - Do not disclose experience via social media outlets
- **Set and meet expectations/time line and communicate status with the customer**
 - Offer repair/replacement options, as needed
 - Provide proper documentation on the services provided
 - Follow up with customer/user at a later date to verify satisfaction
- **Deal appropriately with customers' confidential and private materials**
 - Located on a computer, desktop, printer, etc.

4.8 Identify the basics of scripting.

- **Script file types**
 - .bat
 - .ps1
 - .vbs
 - .sh
 - .js
 - .py
 - **Use cases for scripting**
 - Basic automation
 - Restarting machines
 - Remapping network drives
 - Installation of applications
 - Automated backups
 - Gathering of information/data
 - Initiating updates
 - **Other considerations when using scripts**
 - Unintentionally introducing malware
 - Inadvertently changing system settings
 - Browser or system crashes due to mishandling of resources
-

4.9 Given a scenario, use remote access technologies.

- **Methods/tools**
 - RDP
 - VPN
 - Virtual network computer (VNC)
 - Secure Shell (SSH)
 - Remote monitoring and management (RMM)
 - Microsoft Remote Assistance (MSRA)
 - Third-party tools
 - Screen-sharing software
 - Video-conferencing software
 - File transfer software
 - Desktop management software
- **Security considerations of each access method**

CompTIA A+ Core 2 (220-1102) Acronym List

The following is a list of acronyms that appear on the CompTIA A+ Core 2 (220-1102) exam. Candidates are encouraged to review the complete list and attain a working knowledge of all listed acronyms as part of a comprehensive exam preparation program.

Acronym	Definition	Acronym	Definition
AAA	Authentication, Authorization, and Accounting	DHCP	Dynamic Host Configuration Protocol
AAAA	Authentication, Authorization, Accounting, and Auditing	DIMM	Dual Inline Memory Module
AC	Alternating Current	DKIM	DomainKeys Identified Mail
ACL	Access Control List	DMA	Direct Memory Access
ADF	Automatic Document Feeder	DMARC	Domain-based Message Authentication, Reporting, and Conformance
AES	Advanced Encryption Standard	DNS	Domain Name System
AP	Access Point	DoS	Denial of Service
APFS	Apple File System	DRAM	Dynamic Random-Access Memory
APIPA	Automatic Private Internet Protocol Addressing	DRM	Digital Rights Management
APK	Android Package	DSL	Digital Subscriber Line
ARM	Advanced RISC [Reduced Instruction Set Computer] Machine	DVI	Digital Visual Interface
ARP	Address Resolution Protocol	DVI-D	Digital Visual Interface-Digital
ATA	Advanced Technology Attachment	ECC	Error Correcting Code
ATM	Asynchronous Transfer Mode	EFS	Encrypting File System
ATX	Advanced Technology Extended	EMI	Electromagnetic Interference
AUP	Acceptable Use Policy	EOL	End-of-Life
BIOS	Basic Input/Output System	eSATA	External Serial Advanced Technology Attachment
BSOD	Blue Screen of Death	ESD	Electrostatic Discharge
BTX	Balanced Technology eXtended	EULA	End-User License Agreement
BYOD	Bring Your Own Device	exFAT	Extensible File Allocation Table
CAPTCHA	Completely Automated Public Turing Test to Tell Computers and Humans Apart	ext	Extended File System
CD	Compact Disc	FAT	File Allocation Table
CDFS	Compact Disc File System	FAT12	12-bit File Allocation Table
CDMA	Code-Division Multiple Access	FAT16	16-bit File Allocation Table
CERT	Computer Emergency Response Team	FAT32	32-bit File Allocation Table
CIFS	Common Internet File System	FSB	Front-Side Bus
CMD	Command Prompt	FTP	File Transfer Protocol
CMOS	Complementary Metal-Oxide Semiconductor	GFS	Grandfather-Father-Son
CPU	Central Processing Unit	GPS	Global Positioning System
DC	Direct Current	GPT	GUID [Globally Unique Identifier] Partition Table
DDoS	Distributed Denial of Service	GPU	Graphics Processing Unit
DDR	Double Data Rate	GSM	Global System for Mobile Communications
		GUI	Graphical User Interface
		GUID	Globally Unique Identifier

Acronym	Definition	Acronym	Definition
HAL	Hardware Abstraction Layer	NAC	Network Access Control
HAV	Hardware-assisted Virtualization	NAT	Network Address Translation
HCL	Hardware Compatibility List	NetBIOS	Networked Basic Input/Output System
HDCP	High-bandwidth Digital Content Protection	NetBT	NetBIOS over TCP/IP [Transmission Control Protocol/Internet Protocol]
HDD	Hard Disk Drive	NFC	Near-field Communication
HDMI	High-Definition Multimedia Interface	NFS	Network File System
HSM	Hardware Security Module	NIC	Network Interface Card
HTML	Hypertext Markup Language	NTFS	New Technology File System
HTTP	Hypertext Transfer Protocol	NVMe	Non-volatile Memory Express
HTTPS	Hypertext Transfer Protocol Secure	OCR	Optical Character Recognition
I/O	Input/Output	OLED	Organic Light-emitting Diode
IaaS	Infrastructure as a Service	ONT	Optical Network Terminal
ICR	Intelligent Character Recognition	OS	Operating System
IDE	Integrated Drive Electronics	PaaS	Platform as a Service
IDS	Intrusion Detection System	PAN	Personal Area Network
IEEE	Institute of Electrical and Electronics Engineers	PC	Personal Computer
IMAP	Internet Mail Access Protocol	PCIe	Peripheral Component Interconnect Express
IOPS	Input/Output Operations Per Second	PCL	Printer Command Language
IoT	Internet of Things	PE	Preinstallation Environment
IP	Internet Protocol	PII	Personally Identifiable Information
IPS	Intrusion Prevention System	PIN	Personal Identification Number
IPS	In-plane Switching	PKI	Public Key Infrastructure
IPSec	Internet Protocol Security	PoE	Power over Ethernet
IR	Infrared	POP3	Post Office Protocol 3
IrDA	Infrared Data Association	POST	Power-on Self-Test
IRP	Incident Response Plan	PPP	Point-to-Point Protocol
ISP	Internet Service Provider	PRL	Preferred Roaming List
ITX	Information Technology eXtended	PSU	Power Supply Unit
KB	Knowledge Base	PXE	Preboot Execution Environment
KVM	Keyboard-Video-Mouse	RADIUS	Remote Authentication Dial-in User Server
LAN	Local Area Network	RAID	Redundant Array of Independent (or Inexpensive) Disks
LC	Lucent Connector	RAM	Random-access Memory
LCD	Liquid Crystal Display	RDP	Remote Desktop Protocol
LDAP	Lightweight Directory Access Protocol	RF	Radio Frequency
LED	Light-emitting Diode	RFI	Radio Frequency Interference
MAC	Media Access Control/Mandatory Access Control	RFID	Radio Frequency Identification
MAM	Mobile Application Management	RJ11	Registered Jack Function 11
MAN	Metropolitan Area Network	RJ45	Registered Jack Function 45
MBR	Master Boot Record	RMM	Remote Monitoring and Management
MDM	Mobile Device Management	RTO	Recovery Time Objective
MFA	Multifactor Authentication	SaaS	Software as a Service
MFD	Multifunction Device	SAN	Storage Area Network
MFP	Multifunction Printer	SAS	Serial Attached SCSI [Small Computer System Interface]
MMC	Microsoft Management Console	SATA	Serial Advanced Technology Attachment
MSDS	Material Safety Data Sheet	SC	Subscriber Connector
MSRA	Microsoft Remote Assistance	SCADA	Supervisory Control and Data Acquisition
MX	Mail Exchange		

Acronym	Definition	Acronym	Definition
SCP	Secure Copy Protection	TKIP	Temporal Key Integrity Protocol
SCSI	Small Computer System Interface	TLS	Transport Layer Security
SDN	Software-defined Networking	TN	Twisted Nematic
SFTP	Secure File Transfer Protocol	TPM	Trusted Platform Module
SIM	Subscriber Identity Module	UAC	User Account Control
SIMM	Single Inline Memory Module	UDP	User Datagram Protocol
S.M.A.R.T.	Self-monitoring Analysis and Reporting Technology	UEFI	Unified Extensible Firmware Interface
SMB	Server Message Block	UNC	Universal Naming Convention
SMS	Short Message Service	UPnP	Universal Plug and Play
SMTP	Simple Mail Transfer Protocol	UPS	Uninterruptible Power Supply
SNMP	Simple Network Management Protocol	USB	Universal Serial Bus
SODIMM	Small Outline Dual Inline Memory Module	UTM	Unified Threat Management
SOHO	Small Office/Home Office	UTP	Unshielded Twisted Pair
SPF	Sender Policy Framework	VA	Vertical Alignment
SQL	Structured Query Language	VDI	Virtual Desktop Infrastructure
SRAM	Static Random-access Memory	VGA	Video Graphics Array
SSD	Solid-State Drive	VLAN	Virtual LAN [Local Area Network]
SSH	Secure Shell	VM	Virtual Machine
SSID	Service Set Identifier	VNC	Virtual Network Computer
SSL	Secure Sockets Layer	VoIP	Voice over Internet Protocol
SSO	Single Sign-on	VPN	Virtual Private Network
ST	Straight Tip	VRAM	Video Random-access Memory
STP	Shielded Twisted Pair	WAN	Wide Area Network
TACACS	Terminal Access Controller Access-Control System	WISP	Wireless Internet Service Provider
TCP	Transmission Control Protocol	WLAN	Wireless LAN [Local Area Network]
TCP/IP	Transmission Control Protocol/Internet Protocol	WMN	Wireless Mesh Network
TFTP	Trivial File Transfer Protocol	WPA	WiFi Protected Access
		WWAN	Wireless Wide Area Network
		XSS	Cross-site Scripting

CompTIA A+ Core 2 (220-1102) Proposed Hardware and Software List

**CompTIA has included this sample list of hardware and software to assist candidates as they prepare for the A+ Core 2 (220-1102) exam. This list may also be helpful for training companies that wish to create a lab component to their training offering. The bulleted lists below each topic are sample lists and are not exhaustive.

Equipment

- Apple tablet/smartphone
- Android tablet/smartphone
- Windows tablet
- Chromebook
- Windows laptop/Mac laptop/Linux laptop
- Windows desktop/Mac desktop/Linux desktop
- Windows server with Active Directory and Print Management
- Monitors
- Projectors
- SOHO router/switch
- Access point
- Voice over Internet Protocol (VoIP) phone
- Printer
 - Laser/inkjet
 - Wireless
 - 3-D printer
 - Thermal
- Surge suppressor
- Uninterruptible power supply (UPS)
- Smart devices (Internet of Things [IoT] devices)
- Server with a hypervisor
- Punchdown block
- Patch panel
- Webcams
- Speakers
- Microphones

Spare parts/hardware

- Motherboards
- RAM
- Hard drives
- Power supplies
- Video cards
- Sound cards
- Network cards
- Wireless network interface cards (NICs)
- Fans/cooling devices/heat sink
- CPUs
- Assorted connectors/cables
 - USB
 - High-Definition Multimedia Interface (HDMI)
 - DisplayPort
 - Digital visual interface (DVI)
 - Video graphics array (VGA)
- Adapters
 - Bluetooth adapter
- Network cables
- Underterminated network cable/connectors
- Alternating current (AC) adapters
- Optical drives
- Screws/standoffs
- Cases
- Maintenance kit
- Mice/keyboards
- Keyboard-video-mouse (KVM)
- Console cable
- Solid-state drive (SSD)

Tools

- Screwdriver
- Multimeter
- Wire cutters
- Punchdown tool
- Crimper
- Power supply tester
- Cable stripper
- Standard technician toolkit
- Electrostatic discharge (ESD) strap
- Thermal paste
- Cable tester
- Cable toner
- WiFi analyzer
- Serial advanced technology attachment (SATA) to USB connectors

Software

- OSs
 - Linux
 - Chrome OS
 - Microsoft Windows
 - macOS
 - Android
 - iOS
- Preinstallation environment (PE) disk/live compact disc (CD)
- Antivirus software
- Virtualization software
- Anti-malware
- Driver software
